

## Process for Related Services Consultations

The “Request for Assistance” may be initiated by a special education teacher, counselor (counselor, on behalf of SST committee), or LSSP/Diag/SLP, parent, ARD Committee, or another related services. If a general education teacher has concerns, the teacher should discuss those concerns with the campus SST.

**Contact/Discussion/Collaboration:** informal process, not requiring parent consent, in which information about a student is shared and a joint decision is made on how to proceed (ex: no further action is needed, consultation, or evaluation)

**Consultation:** formal process, requiring parent consent (brief overview of process is sufficient), in which the service provider can conduct observations or screening procedures in order to make recommendations

**Evaluation:** formal process, requiring informed parent consent (detailed information about the process is needed), in which the service provider determines if a student is eligible to receive related services
